

Benefit of a global network

... For the Club members:

they gain first-hand insights into the politics, economy and society of the countries of the "Ambassador"

they are provided with feedback on how the EU is perceived and evaluated by the "ambassador"

they benefit from an authentic, exciting and personal mediation

they experience the added value of a change of perspective

they receive valuable tips for individual trips

they receive orientation and assistance in all aspects of education, training and career entry in the respective country of the "ambassador"

... For the "Ambassadors":

they have the opportunity to present themselves, their professional activities and their country

they get a personal contact to the members of the club

they can in this way establish contacts with potential young people in Europe (interns, professionals) or to companies and other institutions

they themselves can also benefit from our network and they can also propose suitable people for a political-intercultural internship in Germany or Brussels

they can participate in our various activities digitally or - if possible - live

... For the Club NfE e.V.:

A strong network is the DNA for a club that is committed to a vibrant international understanding in a united Europe and beyond

In order to act as a driving force, initiator and motor for an active commitment to a European integration, we need initiators from outside

Through the ambassadors, we benefit from a change of perspective, which will then be incorporated into the strategic orientation and activities of our club

... that is why we are looking for country ambassadors for our global Network

Contact

You know a person from Europe or a non-European country who could act as an ambassador?
Please get in touch with our contact person.
